**You've got a bright future.
We'll do our part to help keep it that way.**

Your generation will need as much electricity as is being used these days. Maybe more. We at Texas Electric are working to provide you with the electricity you'll need for college, your homes and your jobs.

In the past, we've used mostly natural gas and oil to make electricity. Today, we're making almost half of our electricity in plants built to use lignite coal. And, we're building a plant to make electricity using uranium fuel. By using these cheaper and more abundant fuels, we'll help keep your future looking bright.

I have just received
your letter of the 10th inst.
and am glad to hear
that you are still
interested in the
cause of the
colored people.
I am sure that
your efforts will
be successful in
bringing about
the desired
reform.
